## SPECIFICATION

### Disposable liner cooking utensil

Printed in the United Kingdom for Her Majesty's Stationery Office, 8818935, 2485, 18396. Published at the Patent Office, 25 Southampton Buildings, London WC2A 1AY, from which copies may be obtained.

- 5 This invention relates to a cooking utensil with a disposable inner liner.

Cooking utensils are heat resistant vessels in which food substances are placed for the purposes of mixing and cooking.

- 10 Conventional cooking utensils, however, require cleansing after each use, for reasons of basic hygiene.

According to the present invention, there is provided a two-piece utensil, comprising a base, in the form of a plate of heat-resistant material, such as

- 15 Aluminium, or other metal, with at least one projection from its perimeter, and provision for a handle, or handle stub thereon.

The projection(s) incorporates fixing points, by means of which the second part of the utensil, a vessel of aluminium, or other metal, or heat resistant substance, of similar plan, dimensions and profile to the base, is secured to the base.

- 20 A specific embodiment of the invention will now be described by way of example, with reference to the accompanying drawings, in which:—

Figure 1 shows in side view an example of the complete utensil.

Figure 2 shows, in plan an example of the base unit alone.

- 30 Figure 3 shows, an example of a disposable container.

Referring to the drawing, the utensil comprises a base 1 and a disposable lining vessel 2, which is secured to the base projections 3 by, for example a projecting lip, a clip, or similar means.

- 35 In order to insert the liner 2 into the base, the rim of the liner is secured, to each of the projections 3 as described above.

The utensil is now complete and may be used as a conventional cooking utensil for food preparation.

- 40 On completion of food preparation, the used liner is removed from the base by disconnecting the liner 2 from the base projections 3. For continued use of the utensil, a further liner is inserted into the base as previously described.

### CLAIMS

1. A two-piece cooking utensil with disposable liner comprising a base unit in the form of an aluminium or other metal, or other heat resistant material plate, with at least one projection on its perimeter, and a vessel of aluminium or other metal, or heat resistant substance, of similar plan to the base.

- 50 2. A two-piece cooking utensil as claimed in claim 1, wherein the thin metal vessel is secured to the base projections by means of clips, lugs, or similar means.

3. A two-piece cooking utensil as claimed above, wherein at least one of the base projections is extended, to form a handle-stub.

4. A two-piece cooking utensil as claimed in claim 2 or claim 3, wherein the base plan may be of circular or rectangular or any other shape.

5. A two-piece cooking utensil substantially as described herein, with reference to figures 1 - 3 of the accompanying drawing.

**BASIC-ABSTRACT:**

**The cooking pot comprises a base, in the form of a plate of heat-resistant material, e.g. aluminium, with at least one projection from its perimeter, and a handle, or handle stub. The projection(s) incorporate clips, so that the second part of the utensil, of similar plan, dimensions and profile to the base, can be secured to the base. The liner is made of aluminium foil. This liner is disposable and is discarded after use.**
